Engineered by Tim Hatfield at Cowboy
assisted by Justin Kessler
Mixed by Niko Bolas at Avatar
Assisted by Eric Pfeifer

GROOVE ON THIS...

SANDRINE LEE - took so many great photos, including the cool cover shot - LOVE IT.

WILL LEE - not only plays his ass off all over this record (just check out the ride out on "Even Deeper" ...whoa! brother!), but became a huge supporter of it in so many ways. With care and enthusiasm he brought the whole thing up to a level I never could have dreamed of. You are so inspiring to me.

GARY SIEGER - badass, badass, badass...

CHARLEY DRAYTON - is the most talented musician I've ever met. Cool hair, happening wife - BONUS!

PETER FRAMPTON - the greatest boss a person could wish for. It's a privilege to play with you and an even greater pleasure to know you. Thanks for welcoming me into your world.

NIKO BOLAS - he put his whole heart into this, and his is one of the biggest I've ever known.

RICH MERCURIO - I look forward to many more hits together, more pints and more laughs in the years to come. And, thanks for bringing "Move It Along" home.

ANN KLEIN - rock chick, great friend, AND you hang with my favorite engineer - cool!

TIM HATFIELD - my favorite engineer *(see Ann Klein). The most talented, hard-working couch potato in New York.

JOHN ONDRASIK and Five For Fighting - gave me a glimpse into how it ALL ought to be done.

JOE BAKER - has generously helped me for so many years, in so many ways. I thank you.

JOHN REGAN - Rock solid bassist, rock solid human being. My new brother.

GORDON KENNEDY - brought a couple tunes to us so far, (just Google this man), and there's lots more to come. I had a blast bringing "Nasty Shoe" into the world with you.

CURT SCHNEIDER - got this whole record back on track when I was nearest to hitting a big command -Z.

SCUOLA RECORDS - absolutely, THE most personal and intimate handling of an artist I've ever experienced. (Love you, sweetie!)

BRENDA BAUER - my love. Without you, I'd never have been able to fly my freak flag for all these years.
